Profile

State engineer specialized in renewable energy, with four years of experience in Oil & Gas and solar. I design, wire and commission electrical systems: skids, gas-pipeline SCADA, ATEX cabinets and PV plants, with over 1 MW of solar capacity delivered.

Professional experience

Electrical Engineer, RMBTECH EURL

Mar 2025 – Present

- **SCADA for Sonatrach gas pipelines.** Led the electrical engineering: site audit of 66 isolated stations (solar or grid powered) on GK3, which produced a detailed equipment condition status for each station (good, damaged, vandalized, etc.); deployment on GK1/GK2; pre-engineering of GR1/2/4/6 (integrator: SUPCON).
- **Critical equipment and ATEX.** Engineering for the replacement of an 8500 A rectifier for the AOA electrolysis system; design of an ATEX Ex "p" pressurized cabinet for Sonatrach GP2Z (Arzew).
- **Industrial rehabilitation.** Technical direction, redesign in Eplan, rewiring and automatic commissioning (Siemens S7-1200) of a BOSSAR packaging machine for GBFoods (Jumbo).
- **Agro-industry.** Electrical design for the SCADA system of the OAIC grain silo in Mesra.

Electrical Engineer, PROSKID EURL

Jul 2023 – Mar 2025

- Commissioned 27 Milton Roy chemical anticorrosion dosing skids and their solar installations.
- **ATEX Ex "d" flameproof enclosure.** Designed and built it for a skid, including component mounting and wiring.
- Design and sizing of skid electrical systems and off-grid solar power supplies; power supply, power and control diagrams.
- Design, assembly and wiring of electrical cabinets.

Photovoltaic Design Engineer, Sungy SPA

Oct 2022 – Jul 2023

- Over 300 kWp of installed solar capacity.
- 3D layout, sizing and simulation of PV systems; electrical sizing and diagrams for each installation.
- Commissioning and monitoring; energy sobriety plans; deployable mobile solar solutions.

Freelance

Sept 2018 – Present

Motion design, 3D/AR/VR simulation development and solar PV engineering. Portfolio on Behance, Freelancer, Fiverr.

Thesis project

5 kW autonomous photovoltaic microgrid

May – Jul 2021

- Sized and built a microgrid with a 3 kW PV array, an 800 Ah battery bank, a 50 kVA diesel generator and a three-input hybrid inverter (PV, battery, grid/genset), with electrical and synoptic diagrams.
- Installed the outdoor (PV array, supports) and indoor (inverter, batteries, generator, boxes, ATS) equipment, then commissioned and tested the system.

Education

State Engineer + Master II

2018 – 2021

École Nationale Polytechnique d'Oran – Maurice Audin (ENPO-MA). Valedictorian 2018–2021.

Preparatory cycle in sciences and technologies

2016 – 2018

ENPO-MA

Earlier experience

Document Controller, CEVIELEC SPA: ALRAR gas complex re-instrumentation	2022
Internship, SKTM: 12 MW Dhaya PV plant	2021
Internship, SDO Sonelgaz: MV-LV distribution network	2019
Internship, ENIE Solar: PV panel production	2019
Internship, CITAL: Sidi Bel Abbès tramway traction	2018

Skills and tools

Tools	EPLAN Electric P8 & Pro Panel, Archelios PV, AutoCAD Electrical, TIA Portal / Step 7, Siemens S7-1200, Microsoft Excel, Blender 3D, Adobe Suite
Domains	Oil & Gas, industrial equipment, hazardous areas (ATEX), MCC and switchgear, commissioning, PV system design and sizing, electrical diagrams and schematics, SCADA, industrial automation
Languages	Arabic (native), English (fluent), French (bilingual, DALF C1, 76/100)
Other	Driving license B, national service exempt
